

---

## Overview

---

Zimbra is an enterprise-class email, calendar and collaboration solution, built for the cloud, both public and private. Zimbra offers the most innovative messaging experience available today, connecting end users to the information and activity in their personal clouds.

Built on the power of VMware's virtualization and cloud expertise, Zimbra can be deployed in a private cloud as a virtual appliance or hosted in the public cloud, making it easy for IT to deploy, manage and scale at dramatically lower costs compared to other solutions.

Zimbra Collaboration is an open source messaging and collaboration solution, trusted by more than 5,000 companies and public sector customers, and over 100 million end users, in over 140 countries.

Zimbra includes complete email, address book, calendar, file-sharing and tasks, and can be accessed from the Zimbra Web client, MS Outlook, Mozilla Thunderbird and other standards-based email clients and mobile devices.

**Cloud Zimbra** from Logix is one of the most adopted Email & Collaboration solution by Indian enterprise. It is well acknowledged by VMware that Logix is the largest Paid Zimbra Hosting Provider in India.

---

## Key Benefits of Cloud Zimbra

---

### **Complete Email and Collaboration Solution with High Availability**

---

Zimbra offers sophisticated email, calendaring and collaboration features, but is less complex to deploy/manage and is as much as 50% less expensive than Microsoft Exchange. Zimbra enables high availability through support for virtualization

### **Superior End-User Experience**

---

By providing a rich, consistent user experience on all major platforms (Windows, Mac, Linux)—online through a Web browser (Firefox, Chrome, Internet Explorer, Safari) and via MS Outlook, Thunderbird and other desktop clients—Zimbra increases end-user satisfaction and reduces support costs and user training needs.

### **Simplified and Integrated Unified Communications**

---

IT administrators can easily connect Zimbra to a unified communications solution to provide integrated click-to-call, voicemail, chat and presence for users.

### **Reduced Administration and Maintenance**

---

Zimbra has an easy-to-use Web-based administration console enabling IT administrators to securely access the application anywhere, anytime.

Zimbra also empowers end users through end-user self-service administration, reducing IT administration and support overhead and increasing end-user satisfaction. Zimbra also supports both hierarchical storage management and multitenancy.

## Cloud Zimbra Editions

Zimbra offers 4 Editions, Appropriate edition can be awarded to user based on his/her function usage.
