

Cloud Email Archival

Cloud Email Archival

Overview

The need for Cloud Email Archiving is growing as today's organizations are more frequently asked to keep, and deliver on demand, access to the comprehensive library of all sent and received email messages.

Due to strict compliance guidelines, administrators often need features that enable quick and secure delivery of past emails and a message audit history to address legal scrutiny. From an operations perspective, email archiving provides the ability to ease the strain on physical storage by moving emails off the email server without sacrificing access to the messages.

Introduction to Logix Cloud Email Archival

Logix delivers farsighted archiving solutions that continue to evolve with market requirements, and has been archiving Large Organization and government information since its inception.

Logix Cloud Email Archival is a complete and affordable email archiving solution on the cloud, enabling you to effectively index and preserve all emails, enhance operational efficiencies and achieve regulatory compliance needs. Leveraging standard policies and seamless access to messages, email content is fully indexed and backed up to enable administrators, auditors and end users quick retrieval of any email message stored in an organization's email archive.

Cloud Email Archival works in conjunction with Logix Secure Relay (Premium Spam & Virus filtering solutions on the cloud) and is available as an add-on to all customers whose mail Boxes are hosted with Logix. Customer may be hosted on Exchange or Zimbra or Logix Mail. Logix Email Archival provides multiple tools, enabling archiving and historical imports, search and retrieval, message storage, and roles to provide in-depth control over individual and organization-wide email archives

Features of Logix Cloud Email Archival

Archiving – Once Cloud Email Archiving is enabled for a user, copy of all mails (Sent / Received) by the user gets archived. User can authenticate using the same mailbox credentials to access Email Archive.

Historical Data Upload – Users older .PST can be imported into the archive by uploading the same it to FTP space provided , Archiving System on scheduled basis imports Historical Data.

Indexing – A Using a thorough list of all message components, emails are fully indexed by message content and attachments with the option to add tags for customized searches.

Search and retrieval – The Archive Search tool located in the Web user interface conducts quick full-text searches based on tags or message content. Users can easily search personal email archives, view emails in the archive and forward emails to active mailboxes

MS Outlook Search Plug-in – User can search & retrieve mails from Archive Store directly from MS Outlook Client by using the Email Archive Plug-in for MS Outlook (2k7 onward supported)

Single instance storage – With the use of single instance storage, Logix Cloud Email Archival intelligently removes duplicate emails or attachments from a message thread, ensuring only one copy is compressed before storing it in a file system to maximize storage capacity. Mails are stored on highly redundant Storage Area Network (SAN)

PST files import – Scattered PST files stored on users' desktops or laptops can also be imported. In conjunction with the MAPI email import feature, this allows you to create a comprehensive archive of new and historical emails.

Roles – Using role-based administration, access privileges are organized in two tiers and can be designated to the administrator & end user respectively.

Litigation readiness and discovery process – By using the powerful searching capabilities, auditors and email administrators can easily sort through an email archive to compile relevant messages based on keywords, dates & sender /recipients into an exported file. Access records can be readily compiled and delivered to legal counsel as requested.

Extensive Search – Both Administrator & End User can launch an extensive search via Browser or from MS Outlook on the archived email data. Mails which match the search criteria will be shown up, admin or end user can download mails in .PST or .EML formats.

Retention Period – Cloud Email Archiving retention period if set to 10 Years ie 3650 Days , User / Admin can retrieve data upto 10 years.

How does Cloud Email Archival work?

Cloud Email Archiving for Customer whose email is **Hosted with Logix**

When Cloud email archiving is enabled for a user or set of mailboxes, Copy of all mails sent/ received a copy goes to Journal Account. Cloud email Archiving system polls the Journal account and archives the mail.

Cloud Email Archiving for Customer whose email is **Not hosted with Logix**

We will provide a Journal account ID, your messaging system should support Journaling feature, copy of every mail sent / received get pushed to journal account. This Journal Account is polled by the Cloud Email Archiving system to archive emails
